

Millburn District 24 Students: All Bound for College and Careers

District #24 believes all students should have the option of attending college upon graduation from high school and/or to be “career ready. MAP (The Measures of Academic Performance) test is one measurement tool that can be used to chart each student’s path towards that goal. The information below shows minimal performance targets. Please note it is not uncommon for District 24 students to exceed these targets.

Grade	Typical National Norm Fall RIT	Typical Target Spring RIT	Scores for On Track for College/Career Readiness
8	230	235	238
7	225	233	236
6	219	226	229
5	212	224	227
4	203	214	217
3	192	208	211
2	179	194	197

Grade	Typical National Norm Fall RIT	Typical Target Spring RIT	Scores for On Track for College/Career Readiness
8	220	225	228
7	217	222	225
6	213	218	221
5	208	215	218
4	201	209	212
3	192	203	206
2	179	192	195

The ABC’s of keeping your student on track for college and/or career readiness:

Academic progress as measured by MAP scores, is a tool that can assist students with keeping on pace for enrollment in college preparatory classes in high school.

Put forth the **B**est effort possible. Active participation in class, timely completion of all assignments and a willingness to accept challenges will keep a student on track.

Chart academic growth. Compare your child’s RIT score with the Target Spring RIT score to the left. Are they on the path to success?

Note: Scores for On Track for College and Career Readiness is typically about 3 RIT points above the typical Spring RIT target.

If you have concerns about your child’s growth or progress, please contact his or her teacher or Dr. Kucera at 847-245-2898 or ckucera@millburn24.net.
