To: Board of Education Members

From: Ellen E. Mauer, PhD

Subject: Energy Audit

Fanning Howey approached Shawn and Lisa regarding some energy concerns that Shawn had expressed at the IASB conference. Shawn and Lisa met with them and they have offered to do a free audit at only one school. The purpose would be to identify areas in which we could make architectural and/or behavioral changes in order to conserve energy and money. There are matching grants available, and they are given after the work is completed.
