Subject: Red Apple Pre-School Room Rental

A BOE member has asked for this topic to be added to our agenda. To summarize, Red Apple asked me what the possibilities might be for us to rent them a few rooms next year. I investigated and found that we were able to do this for one year for 8.5% of their profits according to our current rental agreement. We had the rooms available for this next year and any concerns regarding their personnel, their methods for communication, use of our office staff, and drop off/pick up times were discussed. Community members had previously suggested that we try this type of rental and I could see no reason we should not give it a chance to see if it would work. We will not know what the 8.5% dollar amount will be until we see what the enrollment for this program will be closer to September.
