Subject: Paraprofessional Position-Special Education

Proposed Action by the Board of Education

Approve the addition of a full time special education paraprofessional.

Background

We have a child who is new to the district requiring this type of support. We are mandated to provide it. All other options for service have been explored. If we need to discuss this in detail, we will need to go into executive session to do it so we are not compromising the confidentiality of the child.
