Dear Parents,

Third Grade is the year we expect mastery of all 36-multiplication facts. This year our class will be learning these facts as patterns. We will focus on learning one new pattern each day, or 4 a week. On Friday we will take a quick test on these patterns. Each week's test will include the previous patterns also. I have suggested that each student practices 1 new pattern a day with a quick review of the previous patterns. Please say these to your child as in the following examples: (9, 8, blank,) (blank, 8, 72) (9, blank 72) please initial after each day to indicate practice. With your support your child could master these Multiplication Patterns in 9 weeks! Thank you.
